Art Unit: 3762

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-38, 48-67, drawn to a method of reshaping a catheter in the human body, classified in class 604, subclass 500.

II. Claims 39-47, drawn to a combination catheter, classified in class 604, subclass 95.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the apparatus claim could be used in another type of body for delivering cleaning fluids and the sort.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
